

POCKETSMART AI

Project Documentation Phase

Purpose: The documentation phase records the complete details of the PocketSmart AI project, including its purpose, features, technologies, development process, testing, and future improvements.

1. Project Overview

- Describe the purpose of PocketSmart AI.
- Explain the problem the project is designed to solve.
- Mention the target users and the main benefits of the application.

2. Problem Statement

- Explain the difficulties users may face in tracking expenses and managing budgets.
- Describe why a simple AI-assisted financial management application is useful.

3. Objectives

- Track income and expenses.
- Help users manage their budget.
- Provide simple savings guidance.
- Use AI to generate useful financial insights.
- Provide a simple and user-friendly interface.

4. System Requirements

- Document the required hardware and software.
- Mention the programming language, frameworks, libraries, and AI service used.
- Record the environment required to run the application.

5. System Design

- Document the application architecture and workflow.
- Include system flow, database design, and important module descriptions.
- Explain how the user interface connects with the application logic and AI service.

6. Module Documentation

- User input and expense management module.
- Income and budget management module.
- Savings and financial insight module.
- AI assistance module.
- User interface module.

7. Development Documentation

- Record the major development steps.
- Explain important implementation decisions.
- Document the technologies and APIs used in the project.
- Maintain notes about important configuration and setup steps.

8. Testing Documentation

- Record test cases and expected results.
- Document errors found during testing.
- Record corrections and retesting results.
- Confirm that the major features work as expected.

9. User Guide

- Explain how to start the application.
- Explain how to enter income and expenses.
- Explain how to set or view a budget.
- Explain how to use the AI assistance feature.
- Explain the meaning of the displayed results.

10. Future Enhancements

- Add more advanced financial analysis.
- Improve personalized AI recommendations.
- Add charts and reports for spending patterns.
- Add more secure data storage options.
- Provide additional features based on user requirements.

11. Documentation Checklist

Document	Status to Maintain
Project Overview	Completed and updated
Requirements	Recorded clearly
System Design	Diagrams and descriptions included
Modules	Each module explained
Testing	Test cases and results recorded
User Guide	Steps explained simply
Future Scope	Possible improvements listed

Conclusion

The documentation phase provides a clear record of the PocketSmart AI project. Good documentation makes the project easier to understand, maintain, test, present, and improve in the future.
